A live video broadcast of the Review will be available at: <https://video.calepa.ca.gov/>

PURPOSE

The Delta Stewardship Council's Delta Science Program is facilitating an independent scientific review of the Sacramento Water Allocation Model (SacWAM), a hydrology and system operations model, to inform the State Water Resources Control Board (SWRCB) on the suitability of SacWAM for applications related to the SWRCB's update of the Bay-Delta Plan. SacWAM was developed by the Stockholm Environment Institute (SEI) and the SWRCB. The Independent Science Review Panel's findings and recommendations will inform the SWRCB on the adequacy and limitations of the model. For more information, please visit the review website: <http://deltacouncil.ca.gov/event-detail/13662>.

"Coequal goals" means the two goals of providing a more reliable water supply for California and protecting, restoring, and enhancing the Delta ecosystem. The coequal goals shall be achieved in a manner that protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place."

– CA Water Code §85054
